François Chappuis: Snakebite: From Research to Public Health Interventions

Main affiliation: Geneva University Hospitals

Actual Position: Head of Department of Primary Care & Division of Tropical and Humanitarian Medicine

E-mail address: francois.chappuis@hcuge.ch

François Chappuis is a medical doctor specialized in internal medicine and travel & tropical medicine. He holds a master in clinical tropical medicine from the University of Mahidol (Thailand), and a PhD in medical sciences from the University of Antwerp (Belgium). He is professor of humanitarian medicine at the University of Geneva. He currently heads the division of tropical and humanitarian medicine (DTHM) and the department of primary care at the Geneva University Hospitals. The DTHM focuses on prevention and care of travellers, including expatriates working abroad for international NGOs, and on development and research projects in several African and Asian countries.

His teaching and research focus on neglected tropical diseases (NTDs), with a particular interest on epidemiological and clinical management aspects of sleeping sickness, Chagas disease, kala-azar and snakebite.
