Infonote.

Dear Sir or Madam,

The aim of this study is to gain relevant knowledge on sociopolitical attitudes and behaviours amongst European members of the public.

We would highly appreciate your participation in this survey which takes approximately 20 minutes.

You are free to decide whether you would like to participate in the survey, and if you do decide to take part, you can still withdraw from the survey itself at any point. However, please note that once you submit your responses, they cannot be withdrawn from the research.

Whilst participating in the survey presents very little risk to you, it does ask some questions about your political views and there is a small chance you may find this upsetting. If this happens we suggest you withdraw from the survey.

To the best of our ability your answers in this study will remain confidential and you will not be able to be identified in any reports or publications arising from the research. Please be aware that, as with any online related activity, the risk of a breach is always possible. – however, this survey is being distributed in compliance with the most recent data protection law and data protection policies. Please also note we will be collecting geolocation information that provides the postal code of the location **in which you complete the survey**. This will not identify you personally; we need to collect this information in order to better understand the role of neighbourhood.

Please note that other researchers may be interested in the findings of the research, and so fully anonymous versions of the data may be shared with others and/or used for future research.

Please note that panel members who complete this survey will also be invited to participate in a similar survey in about a year's time.

Please note that geolocation (postal code) information is being collected for each survey response.

The survey is conducted on behalf of the collaborative European research project EURYKA. This project is composed from a consortium of teams across Europe: University of Geneva, University of Sheffield, University of Siegen, University of Crete, Scuola Normale Superiore, Firenze, University of Uppsala, University of Warsaw, Sciences Po, Paris, Universtitat Oberta de Catalunya, and European Alternatives. The project is funded by the European Union under the Horizon 2020 research funding scheme.

The research has been ethically reviewed via the University of Sheffield's Ethics Review Procedure.

Please note that your completion of the survey will demonstrate your consent for the responses you provide to be used as outlined in this statement.

Thanks in advance for your participation.
