

Master in Earth Sciences University of Geneva Switzerland

Join the two year Master of Sciences in Geology program at the University of Geneva for a unique scientific, professional and personal experience!

Here are some of the reasons why we attract students from all over the world:

- ✓ We have a friendly international department, with 20 highly qualified academic and technical support staff and a motivated group of over 40 PhD students
- ✓ Access to state-of-the-art analytical laboratories and field data acquisition technology is provided
- ✓ We are located a short distance from spectacular Alpine outcrops, one of our favorite teaching class rooms!
- ✓ This MSc in Geology is offered jointly by the Universities of Geneva and Lausanne, namely the ELSTE (Ecole Lémanique des Sciences de la Terre)
- ✓ Courses are taught in English and French
- ✓ You can specialize in the following subjects:
 - Sedimentary Geology (clastics, carbonates, limnogeology, biostratigraphy)
 - Reservoir Geology and Geo-Energy (hydrocarbons, geothermal)
 - Mineral resources and geofluids
 - Geochronology
 - Volcanology and petrology
 - Geological risks
- ✓ The university has a large financial capability, with an annual budget of ca 700 million Swiss Francs
- ✓ Our MSc program has one of the lowest annual fees worldwide (CHF 500 per semester)
- ✓ An *Excellence Fellowship Program* is available to support outstanding and highly motivated candidates who intend to pursue a Master program
- ✓ This master is an opportunity to live a unique educational experience in a truly international environment at the core of the European region
- ✓ And last but not least: the University of Geneva is constantly ranked amongst the 100 best universities of the world
