

643-A488

Monoclonal antibody against alpha-skeletal actin

Description

- Monoclonal antibody against alpha-skeletal actin developed by the laboratory of Dr. Christine Chaponnier at the University of Geneva.
- This antibody is highly specific for alpha-skeletal actin and does not crossreact with other actin isoforms.

Reference

So far unpublished

Product Specification

Reagent name	α -SKA, clone 3B3
Tested applications	Immunofluorescence, immunohistochemistry, Western blot, ELISA
Immunogen	Synthetic skeletal actin N-terminal decapeptide conjugated to KLH
Reactivity	All mammals
Hybridoma	Available
Raised in	Mouse
Isotype	IgG1

Status

- Available for licensing on a non-exclusive basis
